

FOR IMMEDIATE RELEASE

PlaneGard Offers Exchange Rebate on “Burn Bags”

Johnson City, Tennessee USA, February 20, 2015 – HighWater Innovations, the leader in the Personal Electronic Device (PED’s) onboard fire containment industry, is now offering a customer rebate for “Burn Bags”. PlaneGard’s Michael Gilchrist states, “just send us your ‘Burn Bags’ and receive a \$750 rebate on the purchase of a PG250 or a \$1,000 rebate on the PG350”. HighWater is making this limited time offer to highlight the awareness of the increased level of safety that is associated with PlaneGard over other technologies. In the event of a PED fire (such as cellphones, laptops and tablet PC’s), PlaneGard very safely and effectively captures and contains all the associated flames, heat, toxic organic vapors, and smoke.

Imagine, you and your management team are speeding over the Atlantic at 39,000 feet. Suddenly, one of your execs turns to you and says, “Can you smell that? My laptop is getting really hot and I think something just popped”. You know you have a “burn bag” on-board, but you also realize that the fabric burn bag will do little or nothing to contain the copious quantity of noxious toxic organic vapor and smoke that are beginning to fill your cabin. You remember that you were going to call those guys from PlaneGard, but it’s too late! You’re not prepared to fight the event safely without PlaneGard!!

With PlaneGard on-board the PED can be quickly captured and contained. Just drop the PED into the insulated metal case and close the lid and the dangerous flames, toxic organic vapors and smoke are trapped inside. The unique capture device (aka the scoop) even makes it possible to handle a fully burning PED. No burning eyes or lungs AND no smoke or water damaged cabin interior. **PlaneGard is inexpensive insurance to give you peace of mind about the growing number of PED’s on your aircraft.** Leather covers are now available in a variety of colors.
